

VILLAGE CENTER UPDATE

VILLAGE CENTER – A number of things are happening simultaneously at the Village Center site that offer a glimpse of how the Village Center will look when completed. For example, the new sewers and streets are going into place and the first commercial buildings are rising out of the ground along Schalks Crossing Road. The next four commercial buildings, located along the new Market Street, are expected to be under construction sometime this spring. The residential portions of the Village Center (23 single-family and townhouses, and eight apartments) are not expected to be under construction until most of the commercial development is complete. Completion of the 16-acre Village Center development is expected to occur sometime in the next two years.

Construction of the Village Center, at the intersection of Market Street and Schalks Crossing Road.

RESIDENTIAL – Construction of the new homes at the Village residential site, adjacent to the Fire House on Plainsboro Road, is well underway. Of the 24 single-family and five townhouses in the project, four are occupied (single-family) and the rest are under construction with occupancy of several expected very soon. Completion of this new Village neighborhood is expected by year's end.

new single-family homes. Of the 102 single-family homes, 10 are under construction and 16 are sold. Construction of the 93 unit independent living apartment building is expected to begin sometime this spring. The new intersection at the entrance of the project at Enterprise Drive and Plainsboro Road, which includes bricked crosswalks and traditional-look signal fixtures, was completed late last fall. To date, all of the new sewers, streets, street lights, sidewalks and bike paths are in place, ready and waiting for the new homes and residents to follow. Completion of the construction is expected to occur sometime in the next two years.

SENIOR HOUSING – Construction at the new senior housing site (*Villas & Highlands at Cranbury Brook*), located near Enterprise Drive and the Municipal Center, is also underway. Delays in construction activity this past winter were largely due to weather conditions and plan changes resulting in upgrades to the interiors of the

VOTING AND ELECTIONS
