**RIDER TO APPLICATION**  
**PFV Holdings LLC and PFV Holdings Land LLC**  
**Amended Preliminary & Final Major Site Plan and**  
**Amended Preliminary & Final Major Subdivision**

PFV Holdings LLC and PFV Holdings Land LLC (the “Applicant”) is applying to the Planning Board of the Township of Plainsboro (the “Board”) for amended preliminary & final major site plan and amended preliminary & final major subdivision approval in order to develop a new luxury rental apartment community located at Princeton Forrestal Village (116 Village Boulevard, Princeton, NJ 08540), also identified as Block 104, Lot 1.03, 1.05, 1.06 and 1.07 on the Township of Plainsboro Tax Maps. (the “Property”). The Property also falls within the PMUD zone (Planned Unit Development District).

The proposed development is consistent with the previous approvals for the Property: Resolutions P14-09 and P16-03 (the “Previous Approvals”) as Applicant seeks to develop the Property sequentially with three residential buildings containing a total of 394 units. Sixty-Seven (67) of the units will be affordable to low, very low, and moderate income families, consisting of 6 studio units, 7 one-bedroom units, 40 two-bedroom units, and 14 three-bedroom units, in accordance with the requirements of the State's Uniform Affordable Housing Controls (UHAC). For a further detailed description of the design narrative, please see Exhibit A attached and incorporated herein.

With regard to the proposed subdivision, Applicant seeks to have Lot 1.03 remain for proposed Building A; Lot 1.06 will also remain, but increase in lot area in the northerly direction (portion of area taken from Lot 1.07) for proposed Building B. The remaining portion of Lot 1.07 will be consolidated back into Lot 1.05. Lastly, a new lot will be created around the existing building (previously known as CanDo) for proposed Building C.

Pursuant to N.J.S.A.40:55D-52(b) and N.J.S.A.40:55D-49(g), the Applicant also requests an extended vesting period of five (5) years for the Amended Preliminary and Final Major Site Plan and Subdivision approvals, that would run from the date on which the resolution of amended approval is adopted. This extended vesting period is appropriate and reasonable under the Municipal Land Use Law (MLUL), given the large complexity of the proposed development – i.e. the number of proposed units, current economic conditions, and the Applicant's comprehensive goal to integrate the proposed development with the rest of Princeton Forrestal Village. The subject property is part of a planned development known as Princeton Forrestal Village consisting of retail, office buildings, hotel and other commercial uses and improvements. The residential component of the Princeton Forrestal Village is an important element for the vitality of the planned development. Pursuant to the N.J.S.A.40:55D-52(b), the planning board may grant extended vesting for a reasonable amount of time taking into consideration, the number of dwelling units and nonresidential floor area, economic conditions, and comprehensiveness of the development. The proposal involves a large number of residential units (394 units) located in three separate buildings. The residential project is part of a large-planned development, which requires careful integration with the existing infrastructure and once built, will result in a comprehensive well-planned development.

Applicant submits that the proposed development of this property furthers the intent and purpose of the Township Master Plan and Zoning Ordinance. Applicant has not identified any design waivers or variances, however Applicant requests that the Board grant any waivers deemed necessary by the Board in the review of this application.

**EXHIBIT A**

Design Narrative

February 24, 2024

*Princeton Forrestal Village*

*New Residential Community*

*Plainsboro Township, Middlesex County, New Jersey*

PFV Holdings, LLC, Minno & Wasko Architects and Planners, and the professional project team are proud to submit their collaborative, Schematic design for a new residential community in Plainsboro Township that will seek to sustain the same rich and varied architectural character found within the Princeton Forrestal Village and the greater Princeton area. The proposed new rental apartment community is consistent in many ways with the previous approvals for the property. However, it offers several increased public amenities, pedestrian improvements, building efficiencies, and refined architectural detailing. The proposed development will contain 394 new residences that will be comprised of three, four-story buildings each with a basement level of structured parking, communal indoor residential amenity space, and active outdoor amenity space. The buildings will have a mix of studio, one-, and two-bedroom market rate apartment units, as well as a mix of studio, one-, two-, and three-bedroom affordable apartment units totaling (67) and compliant with UHAC standards. Ample private structured parking will be provided for the residents internal to each building totaling a combined 432 residential parking spaces as well as convenient surface parking spaces located adjacent to each building. The amenities offered to the new residential community include an elegant hotel style lobby, upscale club suite, state of the art fitness center, yoga room, residential co-working areas, and a resort style pool with outdoor grills and lounging areas.

The structures as designed will each have a basement level of structured parking with four levels of wood frame residential apartment units and roof construction above. Factoring in the scale, materials and architectural details found within the Princeton Forrestal Village development and the surrounding area, the exterior materials for the project are to include cast stone-veneer, a variety of brick-veneer, fiber cement siding panels, dark colored vinyl residential windows, PVC Trim, and dimensional fiber-glass roof shingles. While these materials reflect a neutral palette that complements its surrounds, contemporary architectural elements can be seen in the design of the entrance canopies, varied cornice

lines, lighting and the overall detailing of the façades.

The site planning also allows for open landscaped green spaces and continuous sidewalks around the community connecting the residents to the existing retail, restaurants, and public transportation. The proposed site plan includes several new public streetscape improvements as well as a new design for the public plaza area adjacent to Rockingham Row. The existing landscape berms along College Road will be redefined with new site landscaping and plantings while preserving existing trees where the design allows. At Main Street the existing inner row of existing oak trees are proposed to remain maintaining the stately entrance and arrival sequence to the campus. New sidewalks and street trees allow for greater pedestrian connectivity and a new pedestrian entrance located at the intersection of College Rd. and Seminary Dr. will connect to Lionsgate Dr. as well as offer greater connectivity to the future mixed-use Princeton Nurseries development site located across Seminary Dr.

This newest addition to the Village will be supportive of the existing retail, restaurants, hotel and offices. It will provide new residences that can also support the Township's newest employment base, The Princeton Regional Hospital. Finally, this project will complete the pedestrian link to The Windrows along Main Street allowing a safe, beautiful walking experience into the Village as well as connection to the future Princeton Nurseries mixed-use development.
